Fractal - Wikipedia A fractal in three-dimensional space is similar, however, a difference between fractals in two dimensions and three dimensions, is that a three dimensional fractal will increase in surface area, but never exceed a certain volume. Fractals | World of Mathematics Fractals and Dimensions. Fractals are some of the most beautiful and most bizarre geometric shapes. They look the same at various different scales “ you can take a small extract of the shape and it looks the same as the entire shape. This curious property is called self-similarity. What are Fractals? “ Fractal Foundation A fractal is a never-ending pattern. Fractals are infinitely complex patterns that are self-similar across different scales. They are created by repeating a simple process over and over in an ongoing feedback loop. Driven by recursion, fractals are images of dynamic systems “ the pictures of Chaos.
